

# SAMSUNG Rewards

## Everything you need to know to earn more rewards

Welcome to the new world of Samsung Rewards.  
We've introduced an exciting Status System\* to the programme so you can earn more rewards, even faster.

### How does it work?

If you accumulate 5000 rewards points (base points + bonus points) in the first month, you'll move up to Gold Status. Once you're Gold Status, you'll receive the following great benefits:

- Earn 1.15x Points for all sales (base points + bonus points only)
- 20% off Samsung Redemption Items
- Priority response to queries

To stay on Gold Status and take advantage of the extra perks, you'll need to earn 5000 reward points the following month. So as long as you earn 5000 reward points for all sales (base points + bonus points only) a month, you'll stay on Gold Status.

The Status System starts late May, so from 1 June you'll be able to start earning points towards Gold Status. See below for a simple timeline of important dates:

### Make the most of Samsung Rewards

When you complete product training on the Samsung Rewards website, you'll earn extra reward points. Just click on the training button on the home page to complete the training online, or download the training modules and take them home with you. You'll earn 10 Samsung Rewards Points for every correct answer, so good luck.

We'll regularly update the leader board on your account page so you can see who you need to beat to earn bragging rights.

Test your knowledge and see if your product training has paid off. Take the weekly quiz, and for every correct answer, you'll earn 20 Samsung Rewards Points.

### Haven't signed up for Samsung Rewards?

Head to [samsungrewards.co.nz](http://samsungrewards.co.nz) and start earning points today. And while you're there, familiarise yourself with the full list of eligible products, base points and bonus points.

### Important things to remember

- If you're a channel that loads your own points, to be eligible to graduate to Gold Status all your month-end sales must be loaded before the 5th business day of the following month
- For channels that have sales loaded automatically, we will endeavour to load your sales files as quickly as possible to accurately reflect your month's performance

\* Status system runs from late May 2017 – 31 Jan 2018
